Odor Control System

Full-Time Trash Room Odor Control!

WE PROVIDE A COMPREHENSIVE TRASH ROOM ODOR SOLUTION - One that combines *Advanced Technologies*, and proven *All-Natural Odor Neutralizers*. Now you can do more than 'mask' odors with passive systems that rely on ineffective perfumes. We make it possible to eliminate odors at their source.

OUR TWO-STEP SYSTEM uses a combined approach - neutralizing Airborne Odors from accumulated waste using our Advanced *AirStreme™* Misting System with Powerful All-Natural Reactants; and by eliminating odor sources in, around, and under Trash Bins using *BioStreme™* Micronutrients to promote Beneficial Bacterial Processes. *Count on us for consistent, effective odor control every day of the year!*

Airborne Odor Control

UNLIKE SIMPLE MASKING AGENTS, our Misting Odor Neutralizer contains powerful reactants made from essential oils, surfactants, and aromatics. Airborne droplets attract and neutralize odors through active chemical processes.

Surface Odor Control

PROPRIETARY MICRONUTRIENTS soak into trash room floors and bins and other problem surfaces, shifting the balance from anaerobic bacteria (odorous) to facultative bacteria (non-odorous). Our micronutrient formula encourages the growth of naturally occurring, beneficial odor eliminating bacteria.

Your All Natural - Totally Safe Odor Neutralizing Solution for Effective, Hassle-Free Results!
